**RE: Pipeline Right of Way Vegetation Maintenance Project - Pipeline PY740MX and EP736BH
Property near Cambridge Rd, Brookhaven PA**

Dear Property Manager,

As you may be aware, Buckeye Partners, L. P. ("Buckeye") through its affiliate, Laurel Pipe Line Company L.P, own, operate, and maintain petroleum products pipelines located on or next to your property within a right of way easement. This easement provides Buckeye the right to maintain the right of way.

Due to our need to maintain the highest level of pipeline safety, we must clear our right of way of brush, trees, and overhanging tree limbs. Your property has been identified as one that will be involved in this project. We have contracted with **Lanracorp** to perform the work at our expense. Brush will be cut, limbs trimmed or trees to be removed in unmaintained areas as needed. We will NOT be cutting or trimming trees in landscaped areas during this project. This work will start on or around January 4th, 2021. Due to the uncertainty of weather conditions, we are unable to provide an exact date when the work will occur on your property. If you are concerned with the timing of the work please reach out to our representative prior to the start of work.

Should you have any questions regarding the vegetation work or the pipeline, please contact our representative **Jeff Waites** of **610-721-6117**. If he cannot fully response to questions or concerns he will forward them to me at his convenience.

Thank you in advance for your understanding.

Sincerely,

Jeannette McBryan
Right of Way Specialist-Vegetation Management
Buckeye Partners, L.P.
